

# Save 10% on your Energy Bill. No Risk. Guaranteed.

## Optimize your Building with No Retrofits.

HVAC systems use **40-60% of a building's energy**. Most Class A and B buildings **over-ventilate**, wasting **10-20% in energy every year**.

Poppy's **energy optimization program delivers guaranteed savings** without retrofits—by **fixing over-ventilation** in commercial buildings and adjusting HVAC settings to **reduce fan, heating, and cooling** loads, all while meeting healthy air standards **year after year**.

## Why Poppy?

- **No Retrofits. No Capital Investment.**  
Start savings with your existing systems -- from the basics to DOAS and ERVs or DCVs and BAS.
- **Guaranteed ROI.**  
If it doesn't pay for itself, it's on us.
- **Low Risk, High Return.**  
Pay only from the savings we deliver, and track using trusted industry methods (IPMVP).
- **Healthy Air, No Extra Cost.**  
Align with ASHRAE standards and get credit for building certifications—without wasting energy.

**REDUCE**  
your energy bills

**EXCEED**  
your decarb goals

**VERIFY**  
healthy airflow

# Lower Your Energy Bill. Not Your Standards.

Cut ventilation energy costs while meeting the highest indoor air standards—no upfront costs, no risk.

## Poppy's ESCO Model

With Poppy's shared-savings model, you only pay from verified savings.

No savings? No payment. It's that simple.

We guarantee results using industry-standard M&V to prove your ROI—so you stay energy-efficient and compliant with air quality standards.

## How It Works

No new equipment needed. No disruptions.

Using **real-time air tracing**, we fine-tune airflow to meet **ASHRAE 241** and **62.1** standards—cutting energy waste while keeping air safe.

## From Start to Savings

1. **Select** a Candidate Building
2. **Assess** Ventilation & Energy Savings
3. **Optimize** Outdoor & Recirculated Airflows
4. **Maintain** Ongoing Savings Automatically
